

## **4-in Prepacked Well**

A prepacked well consists of a slotted PVC environmental well screen, surrounded by a stainless-steel mesh. #20/40 grade environmental filtration sand is packed between the environmental PVC and the stainless-steel mesh. The method of packing equalizes distribution of the sand around the well screen, thus reducing disturbance of the natural formation and installation time. Made in the USA.

### **Overall Dimensions:**

ID: 3-in

OD: 5.5-in

Length: 5-ft

### **Inner Screen:**

4-in S40 Flush Thread PVC

ID: 4-in

Slot Size: 0.010-in

Length: 5-ft

Thread Profile: ASTM F480 (2 tpi)

### **Outer Screen:**

Type 304 Stainless Steel Mesh

OD: 5.5-in

Pore Size: 60x60 (.0065)

Length: 5-ft

### **Sand:**

U.S. Silica FilPro Environmental Filtration Sand

Grade: 20/40 (#0). See attached chart for size specifications
